Quantum Pro Voice Tube

Don't let the platinum good looks and sleek lines fool you. For all its state-of-the-art features, the Quantum Pro Voice Tube is as practical and hardworking as it is stylish.

The simple push-button ADDLOCK makes changing from headband to earhook a convenient one-handed operation while a 270° adjustable microphone boom allows for easy flipping from ear to ear.

All-day comfort is further complemented by the headset's exceptional lightness and a self-aligning, floating earpiece that sits comfortably on the ear without pressing against the user's head.

Sound quality is crisp, clear and natural thanks to the use of a broader bandwidth for the speaker combined with an innovative speaker cabinet. While the sound tube achieves amazing clarity by passing the user's voice through a rubber filter to minimise background noise before an inner microphone case restores the sound level.
